Ford 10.25" & 10.5" Bearing Kit and C&P part numbers.

1985 – 1993 10.25"

Use early style bearing kit and crown & pinion
Ex. R1025 & F10-410

1993 – 1999 10.25"

Use early style bearing kit and late style crown & pinion
Ex. R1025 & F10-410L

1999 – 2007 10.5"

If replacing gear set use:
Early style bearing kit and late style crown & pinion
Ex. R1025 & F10-410L
If only doing a minor rebuild (without C&P change) use:
Ex. R1050 bearing kit only (used with OE C&P only)

2008 – 2010 10.5"

If replacing gear set use:
Early style bearing kit, Late style C&P and pinion shim kit.
Ex. R1025 & F10-410L & 1102
If only doing a minor rebuild (without C&P change) use:
Ex. R1050A bearing kit (used with OE C&P only)

* We are not manufacturing a replacement style 10.5" crown and pinion. We have to use the 10.25" late style gear set in its place with the early style inner pinion bearings.

For the 2008-10 applications, in order to use a QG gear set you must add pinion shims behind the inner pinion race to make up the 0.155 difference between a QG and OE gear set.

*Use early style 10.25" bearing kit (R1025) with late style 10.25" gear set (F10-xxxL) and add pinion shims (1102) behind inner pinion race.
